Recomendaciones de siembra

MAS 812HOCP is a new variety for High oleic market with a Clearfield Plus tolerance. MAS 812HOCP is an excellent hybrid to secure sunflower production even in northern areas thanks to its earliness. This variety has a good disease profile against main sunflower diseases (Phoma, sclerotinia, mildew). MAS 812HOCP will be a new standard in High oleic CLP market.

| | Condiciones óptimas | Condiciones limitantes |
|----------------------------|--------------------------|--------------------------|
| Adaptación | 4 en 4 | 4 en 4 |
| Densidad de plantas | 65000 - 68000 Plantas/ha | 50000 - 55000 Plantas/ha |

The results and recommendations given in this document are the values based on MAS Seeds R&D network and are intended for general guidance. We cannot assume any liability for the future achievement of these values, as the individual results and the performance may vary in different local growing, soil and weather conditions.
