Recomendaciones de siembra

TRIMARAN is a high-performing corn variety delivering excellent yields in both grain and silage. Its plant quality, characterized by healthy leaves, robust stems, and stay-green, ensures optimal performance throughout the growing season. This variety is especially well-suited for high-potential fields under irrigated conditions, to reach top yield.

	Condiciones óptimas	Condiciones limitantes
Adaptación	4 en 4	3 en 4
Densidad ensilado (pl/ha)	90000 Plantas/ha	80000 Plantas/ha
Densidad grano (pl/ha)	80000 Plantas/ha	70000 Plantas/ha

The results and recommendations given in this document are the values based on MAS Seeds R&D network and are intended for general guidance. We cannot assume any liability for the future achievement of these values, as the individual results and the performance may vary in different local growing, soil and weather conditions.
